

Dry food

FORMULA N°1

St Laurent

Small New World monkeys

Pellet size: 6 x 25 mm

(Reference: 300014)

Presentation

Specifically adapted for NEW WORLD MONKEYS and particularly for the CALLITRICHIDS.

The pellets can be used as a complete food, sufficient in itself to meet the nutritional needs of these primates.

In order to cater for the particular needs of each species, it is also possible to use a mixture of this formula (n° 1) and the formula for folivores (n° 2). Fresh fruit and vegetables can be also given daily in reasonable quantities.

Gluten and lactose free, without added sugar, palm oil, colourings or preservatives.

Recommendations

Variety is the key in the primate diet.

The daily ration should take into account the animal's level of exercise, its physiological stage and the digestibility of the food.

Food should be given in sufficient quantities to ensure the good physiological condition of the animals.

Check the amounts consumed and the animal's state of health.

Composition

Cereals, by-products of plant origin, processed animal protein (poultry), fruit, shellfish, minerals, yeast, vitamins, flavouring (EC approved)

Pack size

15 kg bag
Pellet size: 6 x 25 mm

Analysis

Crude protein	%	24,50
Crude fat	%	4,60
Crude fibre	%	7,10
Ash	%	8,20

Instructions

Store in a cool dry place, and close the bag after use.

Serve with clean fresh water freely available.
